I'm Selçuk Coşkun, a computer engineer and prompt engineer specializing in stable diffusion. My commitment to staying up to date with technology ensures I understand and solve challenges efficiently. My high adaptability and fast learning ability has served me well all my life and carried me ever forward.

Education

Politecnico di Torino — Torino, IT
Studied abroad in Politecnico di Torino for a year, Master's in Computer Engineering — 10/2022 – 10/2023

MEF University — Istanbul, TR
Bachelor's Degree, Computer Engineering. GPA 3.07 Honor Student — 09/2018 - 01/2022
Thesis: BCISNN (Brain Computer Interface using Spiking Neural Networks)
Co-created a neural network with a team of 4 people, created a neural network which achieved 80%+ accuracy, worked on EEG signal processing and cleaning
Relevant Coursework: Horde mode survival game made in Unity Engine, REST API Website using React and Docker, designed 16 Bit Dual Core CPU and wrote C code for its assembler

Terakki Foundation Schools High School — Istanbul, TR
C++ coding lessons, helped in IT support — 09/2012 - 06/2017

Experience

Freelancer — Remote, TR
Prompt Engineer — 03/2023 – Present

- Proficiency working with Stable Diffusion 1.5 and Stable Diffusion XL
- Training LORAs on Stable Diffusion 1.5 (Low-Rank Adaptation) on Nvidia GPUs
- Sales using PayPal
- Advertising utilizing social media

Başarsoft Bilgi Teknolojileri A.Ş. — Istanbul, TR
Intern — 06/2020 – 07/2020

- Created a geolocation website using asp.NET that utilizes markers that are deposited in a database utilizing PostgreSQL.
- Weekly progress reports with daily stand-ups.

Başarsoft Bilgi Teknolojileri A.Ş. — Istanbul, TR
Intern — 06/2019 – 07/2019

- First job experience.
- In this internship I helped with clerical work and refined my web programming skills.
- Created a map-based game (for ex. Pokémon GO) in Unity Engine with the support of Başarsoft's geolocation technology expertise.

Leadership & Activities

BCISNN Research — Istanbul, TR
EEG Signal Processor — 09/2021 – 06/2022

- Gathered and cleaned up EEG signals on MATLAB
- Oversaw and wrote the project thesis in collaboration with my project partner and professor

SELÇUK COŞKUN
Computer Engineer

Monster Wipeout Game Istanbul, TR
Game logic | Balance 06/2019 – 07/2019

- Responsible for game collision, physics
- Coded game logic using C# scripting

Game Team Collaboration Torino, IT
Leader | HR 02/2023 – 04/2023

- Filtered candidates to ensure group chemistry
- Scheduled and managed an eight-person team
- Resolved conflicts
- Played to teammates strengths to further expediate reaching the goal
- Made sure team members were punctual and performative 4 days a week for the duration of the collaboration.

Skills & Interests

Technical: Java, Python, C, HTML, CSS | Intermediate // C++, C#, Lua | Beginner // Unity, Unreal Engine | Beginner
Language: English CEFR Level C2 [IELTS 8.5], Japanese N5, German B1, Turkish Native
Interests: Emulation, Computer hardware, Console modding, Retro hardware, Composing music, Creating tech powered solutions for everyday life, Virtual Reality, Meta Quest hardware, Playstation, Handheld hardware
