SELÇUK COŞKUN

Computer Engineer · Generative AI Specialist · Content Creator (ScSyn)

Istanbul, Turkey • selcuk.workcontact@gmail.com • +90 552 311 93 80 (WhatsApp) • youtube.com/@Sc_Syn

PROFILE

Computer engineer and generative-AI specialist who builds agentic workflows and automation pipelines with Claude, Gemini and the Google AI suite, and produces professional-grade AI imagery and video — from photorealistic advertising to anime illustration, and local video generation with MiniMax H3. Creator of the ScSyn YouTube channel. Highly adaptable, fast learner, always on the leading edge of the tech.

EXPERIENCE

ScSyn — YouTube Creator — **Online**
Content Creator / Host — *Ongoing*

- Plan, record, edit and publish videos covering gaming, hardware and technology.
- Integrate AI tooling into production: thumbnails, visuals, scripting assistance and automated workflows.
- Grow and engage the community across social platforms.

Freelance — Generative AI Engineer & Workflow Builder — **Remote**
Self-employed — *03/2023 – Present*

- **Agentic workflows:** design multi-step AI agents and automations with Claude, Gemini and the Google AI suite (AI Studio, Vertex AI, Workspace integrations).
- **AI image generation:** deliver client work from realistic product/advert imagery to anime illustration using Flux, Qwen-Image and ComfyUI pipelines.
- **AI video generation:** run local video models (MiniMax H3, Wan) on NVIDIA GPUs for short-form and promotional content.
- Train custom LoRAs for consistent characters, styles and brand assets.
- Handle client acquisition, social-media marketing and sales end to end.

Başarsoft Bilgi Teknolojileri A.Ş. — **Istanbul, TR**
Software Intern — *06/2019 – 07/2019 · 06/2020 – 07/2020*

- Built a geolocation web app with ASP.NET and PostgreSQL-backed map markers.
- Created a location-based mobile game prototype (Pokémon GO style) in Unity.

EDUCATION

Politecnico di Torino — **Torino, IT**
Master's studies in Computer Engineering (1 year abroad) — *10/2022 – 10/2023*

MEF University — **Istanbul, TR**
B.Sc. Computer Engineering · GPA 3.07 · Honor Student — *09/2018 – 01/2022*

- Thesis: **BCISNN** — Brain-Computer Interface using Spiking Neural Networks; 80%+ accuracy, EEG signal processing in MATLAB (team of 4).

LEADERSHIP

Game Team Collaboration — Leader / HR — **Torino, IT · 02/2023 – 04/2023**

- Recruited, scheduled and led an eight-person team four days a week; resolved conflicts and played to members' strengths.

SKILLS

- **Agentic AI & Automation:** Claude (incl. Claude Code), Gemini, Google AI Studio, Vertex AI, Antigravity, prompt engineering, multi-agent workflow design
- **Image Generation:** ComfyUI, Forge NEO, Flux, Qwen-Image, LoRA training — photoreal adverts to anime illustration
- **Video Generation:** MiniMax H3 (local), Wan, video editing for YouTube
- **Programming:** Python, Java, C, HTML/CSS/JavaScript
- **Languages:** English C2 (IELTS 8.5), Turkish Native, German B1, Japanese N5
- **Interests:** Emulation, retro & handheld hardware, console modding, VR (Meta Quest), music composition
